

FLOW+
FORM

FLOW+FORM

A forming process where a pressure-cast preform is “stretched” to a specific flow formed profile and thickness.

This flow forming improves the grain structure of the aluminum making it stronger, lighter and more precise than a traditional cast wheel resulting in forged aluminum-like strength

Cast blank placed into FlowForm mold

Roller presses onto blank and begins to mold wheel

Slowly turning, the wheel begins to take shape

Nearly finished the wheel is looking awesome

Finished wheel has forged aluminum-like strength

FF01

AVAILABLE SIZES
19 - 20"

WEIGHTS START AT
22lbs

WARRANTY
LIFETIME STRUCTURAL
2-YEAR FINISH

AVAILABLE OFFSET
MEDIUM / HIGH

TÜV AUSTRIA VIA CERTIFICATION

STANDARD COLORS **OPTIONAL COLORS**

-  LIQUID SILVER
-  TARMAC
-  ANTHRACITE
-  FOG
